# COACHING

## A Crucial Skill for the New Generation of Leaders

"To manage or to coach? People will manage the work. By attempting to manage people you are limiting their potential. A manager is a title, it does not guarantee success. Coaching is an action, not a title and actions will result in successes!" **Catherine Pulsifer** (Author "Wings for Work")

*"This book covers coaching models and competencies that are extremely important to our learning and practice as a professional coach. The straightforward format allows for application, reflection and further learning whatever our experience. Organizations are more often encouraging a "coach approach" and teaching coaching skills to managers and leaders to create a coaching culture. This does not mean it is a soft approach but rather emphasizes the importance of listening and of open, honest, clear and direct communication."*

**Diane Brennan, MBA, MCC** (ICF President, Global, 2008)
